

TECH-DRIVEN, NATURALLY.

Participate in the **Sustainability Excellence Programme**, to follow an internship on topics related to Sustainability.

The programme, aimed at recent graduates in STEM disciplines and Economic Sciences, will take place at one of the Leonardo's sites in Rome and will last six months, during which a training phase will be provided in collaboration with "Sole 24 ORE Formazione".

You will give your contribution to the implementation of projects with a strong social and environmental impact, capable of bringing value to the communities and territories in which our Group operates, through increasingly effective solutions for global security.

During the internship, mentors and tutors will be at your side to help you best develop your potential and aptitudes.

At the end of the internship period, you will have the opportunity to continue your path in one of the different Leonardo's sites in Italy.

Your commitment will help transform technological innovation and research into increasingly advanced solutions for the protection of the planet and people.

We are waiting for you with your ideas, your passion, your skills!

Applications closed.
