Selex ES consolidates presence in the Kingdom of Saudi Arabia

Fabrizio Giulianini, Chief Executive Officer of Selex ES, a Finmeccanica company, today officially opened the new Riyadh offices of Selex ES Saudi Arabia in the presence of highly distinguished representatives from the Saudi Arabian government and national agencies.

The offices, situated within the new and prestigious Granada Business Park, provide Selex ES with an ideal base to consolidate and establish business contacts and are conveniently located in the proximity of key customer headquarters and facilities.

In inaugurating the new offices Fabrizio Giulianini, Chief Executive Officer of Selex ES said “The new headquarters demonstrate Selex ES commitment to become a key player in the high technology arena for defence and security in KSA”, adding “we have been working successfully in the country for two decades and we look forward to strengthening our industrial and friendship ties with local industries and government agencies”.

Selex ES bring to KSA break-through technologies that can be applied across a wide range of dual use solutions developed in-country to answer all requirements across the domains of Space, Air, Land and Sea.

Already an established supplier to the defence sector in the Kingdom, the company has much to offer in diverse fields such as cyber security and information assurance, automated systems, air and vessel traffic management systems, protection of critical infrastructure and homeland security, as well as in the new integrated domain known as “Smart cities”.
